

Aircraft Maintenance Practical Skills Workshop @ Tianjin, China (2 Months)

Module 6 Materials & Hardware AND Module 7 Maintenance Practices

IAP's Aircraft Maintenance Practical Skills Workshop allows you to acquire comprehensive aircraft maintenance skills that meet:

- 1. United Kingdom - CAA UK Licence: EASA Part-66 Category B1.1 Licence**
- 2. China - CAAC licence: CCAR-66 Category B1.1 Licence**
- 3. Malaysia – DCA Malaysia: DCAM Part-66 Category B1.1 Licence**

Programme Details:

Intake: May / November

Duration: 2 months (Full-time) / 370 Hours

Medium of Instruction: English

Venue: Tianjin, China

For Whom: We offer best opportunity to train and induct new aircraft mechanics and upgrade the skills of existing mechanics who are working in small airlines and MROs in Asia.

Fresh Diploma and Degree Graduates who want to acquire practical aircraft maintenance skills before deciding whether to enroll for the 2 years full-time Trainee Aircraft Maintenance Engineer Programme (TAME)

Language Proficiency: Good in English and Chinese (Most suitable for Chinese Educated Malaysians / Indonesian)

Fee: MYR 24,000 per Trainee (Tuition Fee Only)

There are three main categories of licence. Below you will find the EASA definition of the CAT B1.1 Licence and modules:

CAT B1.1 Licence: the holder to issue certifications of release to service following maintenance, including aircraft structure, power plants and mechanical and electrical systems. Authorisation to replace avionic LRUs requiring simple tests to prove their serviceability is also permitted.

Course Structure

Module 6 Materials and Hardware (Refer to Syllabus)

Module 7 Maintenance Practices (Refer to Syllabus)

Career Progression

IAP's TAME programme is an intensive 2 years traineeship programme. We take in trainees who are proficient in both English and Chinese, who want to attain either one or more Civil Aviation Authority Aircraft Maintenance Engineers Licences (AMEL).

AMEL is a pre-requisite technical qualification for those seeking employment as an Licenced Aircraft Maintenance Engineers on Fixed Wing or Rotary Wing aircraft.

Programme comprises of classroom sessions, workshop practices and On-the-job Training (OJT) on operational aircraft.

Licensed Aircraft Maintenance Engineers as a Career

Licensed Aircraft Engineers (LAEs) went through highly regulated training and experience gathering regime, who are by law, have the authority to determine whether an aircraft is safe and fit to be released for flight. LAEs certify in writing that the required inspections and maintenance tasks had been carried out in accordance with airworthiness regulatory requirements.

Once the 'Certificate of Release to Service' (CRS) is signed by the LAEs, it becomes a legally binding document and attests to the LAE personal accountability for the aircraft for the technical integrity and safety of the aircraft.

The Aircraft Maintenance Engineers' Licence is recognized internationally under the ICAO Charter and qualified LAEs are very well sought after worldwide.

Acquire Practical Skills In Aircraft Maintenance & Prep Course For EASA Part 66, Module 6 & 7 Exams

May 2013 or November 2013 Intake

@

IAP's Tianjin Campus, People's Republic of China

Program offered in collaboration with the above partners

European Aviation Safety Agency's EASA Part 66 Category B1.1
Module 6 & 7

Materials & Hardware & Maintenance Practices
(2 months of practical skills training)

Approved 147 Facilities, Tianjin Campus, China

Objectives:

- a) For applicants who are interested to gain hands-on, practical experience in aeronautical maintenance for enrichment and career growth;
- b) For applicants enrolling for the full-time Trainee Aircraft Maintenance Engineer (TAME) Programme;

c) Preparation course for EASA Part 66, Modules 6 and 7 examinations.

For Whom:
